Share Savings and Summer Savings Account Disclosure: Dividends are calculated using the daily balance method that applies a daily periodic rate to the daily balance each day during the month above a specified minimum threshold. Dividends begin to accrue on the business day of deposit and shall continue to accrue until the day funds are withdrawn. Dividends are compounded monthly and paid to your account(s) after the close of business on the last day of each calendar month.

Money Market Account Disclosure: The dividend rate and annual percentage yield is subject to change as determined by the Credit Union Board of Directors. Balance Computation Method – Dividends are calculated by the daily balance method, which applies a daily periodic rate to the balance in the account each day. Compounding and Crediting – Dividends will be compounded monthly and will be credited monthly. If you close your account before dividends are paid, you will not receive the accrued dividends. For this account type, the dividend period is monthly, for example, the beginning date of the first dividend period of the calendar year is January 1, and the ending date of such dividend period is January 31. All other dividend periods follow this same pattern of dates. The dividend declaration date is the last day of the dividend period, and for the example above is January 31. Accrual of Dividends – Dividends will begin to accrue no later than the business day on which we receive credit for non-cash items, such as checks.

⁴ MINIMUM BALANCE REQUIREMENTS: The minimum balance required to open this account is \$2,500.00. You must maintain a minimum daily balance of \$2,500.00 in your account each day to avoid a service fee.
